RESEARCH INTERESTS

I enjoy solving challenging biological and mathematical problems by crafting machine learning solutions backed by the implantation of massive data sets. My current research involves developing novel, and adapting existing, machine learning methods for analysis of large neuroscientific data sets to better understand the brain.

EDUCATION

PhD	Biomedical Engineering, Boston University Dissertation: "Machine Learning Framework for Analyzing State-Dependent Neuronal Network Dynamics in Calcium Recordings" Advisors: John A. White, PhD & Mark A. Kramer, PhD	2019 - Present
MS	Biomedical Engineering, Boston University	2019 - 2022
BS	Biomedical Engineering, University of Miami Cum Laude	2015 - 2019

PROFESSIONAL AND RESEARCH EXPERIENCE

Graduate Research Fellow Neuronal Dynamics Laboratory (NDL), Department of Biomedical Engineering, Boston University Advisor: John White, PhD	March 2020-present
<ul style="list-style-type: none">• Develop and adapt linear and manifold learning dimensionality reduction (DR) machine learning methods for unsupervised neuronal network dynamic analyses recorded with calcium imaging under unique neural contexts.• Built constraining for non-negative matrix factorization DR to also allow semi-supervised analysis approaches to neuronal network dynamics.• Develop and write software wrapper packages to make complex machine learning methods more easily accessible and implementable to end users.• Collaborate with experimental lab scientists to best apply developed analytical methods to their collected data to answer groundbreaking, novel, and complex neurological questions.• Design analysis pipeline for rigorously characterizing neuronal network dynamics under: increasing concentrations of anesthetic sedation, and natural and artificial memory recall.	
Breakout Fellow Breakout Ventures	March 2023 – Present
<ul style="list-style-type: none">• Engage with Breakout Investment team to develop investment acumen and proficiency in navigating the venture capital landscape through rigorous case studies.• Regularly conduct due diligence on specific technologies and evaluate the comparative scientific and commercial viability with respect to other technologies and the greater Biotech landscape with the investment team.• Serve as strategic partner in world renown Biotech hub of Boston, Massachusetts, evaluating emerging technologies, startups, and entrepreneurs to connect them with Breakout's expertise and resources.	
Associate Engineer Bio-Vitro Inc, Supervisor: Siddarth Rawal, MD	May 2019 – August 2019
<ul style="list-style-type: none">• Optimized design of previously constructed fluid handling platform for unattended, automated, cell culture and cell signaling analysis under physiological conditions for production and sending to collaborating labs to make organs-on-chips more technically accessible.• Supported/troubleshoot collaborators on use of produced platforms.

dannycarbonero.github.io

Undergraduate Research Assistant

May 2018-August 2018

Research Experience for Undergraduates – Neurological Prosthesis Research Laboratory, Department of Biomedical Engineering, Duke University, Advisor: Warren Grill, PhD

- Modified and completely automated a fully computational, Deep Brain Stimulation, Parkinson's Disease (PD) Neurological model to simulate networks of neurons using experimentally recorded data as inputs.
- Modeled PD in rat brain using upstream, experimentally recorded, neuron firing as input to simulate, characterize, and analyze downstream Thalamus function and activity to assess effectiveness of Deep Brain Stimulation as treatment for PD.

Undergraduate Research Assistant

May 2017 – May 2019

Physiometric Microsystems Laboratory (PML), Department of Biomedical Engineering, University of Miami

Advisor: Ashutosh Agarwal, PhD

- Developed automated software pipelines for immunohistochemical fluorescent microscope image data acquisition, processing, and analysis for reproducible quantification of microphysiological systems.
- Wrote front-end software packages to allow end users to easily and reproducibly process and analyze image data for various platforms (heart, neuro-muscular junction, metastasis).
- Designed, prototyped, and manufactured an integrated and completely automated platform for continuous cell culture and dynamic cell secretion analysis of these microphysiological systems.

Student Analyst

January 2017 – May 2017

Department of Continuing International Education, University of Miami, Supervisor: Magaly Abreu

- Developed early iteration of real-time, self-updating student database to consolidate information and ease access.
- Created financial reports to visualize large volumes of financial data more clearly and concisely.

SKILLS

Machine Learning and Data Science: Linear Dimensionality Reduction, Matrix Decomposition, Manifold Learning, Clustering, Unsupervised/Semi-Supervised/Supervised Learning, Deep Learning (Artificial Neural-Networks) Time Series Analysis, Image Analysis

Data Science Software: Scikit-Learn, Scipy, Statsmodels, Pandas, Tensorflow, Numba

Programming: Highly Proficient in: Python, MATLAB

Comfortable with: HTML, CSS, R

Familiar with: C, C++, Java

High Performance Computing: Unix, Linux, Remote Super Computing Clusters, Code Parallelization (Python, MATLAB), GPU Computing, git Version Control

Engineering Design: CAD, SOLIDWORKS, Rapid Prototyping

Software: Arduino IDE, COMSOL Multiphysics, ImageJ

Document Preparation: Microsoft Office, Adobe Illustrator

Certifications: Six Sigma Green Belt

Languages: Native in Spanish, fluent in English

INVITED TALKS

Boston University Stochastic Processes in Neuroscience Seminar Series
Principal Component Analysis as a Change of Basis for Neural Signals

Boston MA, December 2022

- Seminar series to discuss physical feasibility of stochastic models for neuroscientific data analysis.

Daniel Carbonero

danny.carbonero@gmail.com
dannycarbonero.github.io

Boston University Neurophotonics Center Tech Talk Tutorial Series

Boston MA, September 2022

Linear Dimensionality Reduction for Analyzing Calcium Recordings (a toolbox)

- Seminar series to spread awareness on technologies under development to foster collaboration between labs.

LEADERSHIP & MENTORING

Nucleate, Boston Chapter

Director of Communications

June 2023 – Present

- Direct all Communications and manage the Communications team of the Boston chapter of Nucleate, a student-led organization aiming to facilitate venture creation of pioneering life sciences companies.
- Write all promotional and professional materials advertising to the community at large, or disseminating information to the rest of Nucleate leadership and participating venture teams.
- Collaborate with other team directors bi-weekly to set communication plan and agenda.

Vice President of Communications

November 2022 – May 2023

- Built automated email pipelines to ensure both chapter leadership, and venture teams are updated on all organizational information.
- Worked with the communications team, and leaders of other teams, to write and publish of weekly newsletter.

Neuronal Dynamics Lab - 2021-2022 Senior Design Team Advisor

August 2021 – May 2022

- Advised and mentored senior design team through development of random forest and support vector machine (SVM) depth of anesthesia classifiers using standard neural recordings.

Understanding the Brain: Neurophotonics Yearly Symposium, Session Chair

January 2022

- Spearheaded planning of 5th annual student led symposium where innovators in the field, along with students, congregate to discuss new technologies, methods, and analyses to understand the brain.
- Selected topic (Data Focused Neuroscientific Approaches: Taking a Deeper Look into Neural Networks), invited speakers, and chaired session.

TEACHING EXPERIENCE

Graduate Teaching Fellow

September 2021- December 2021

EK 381 – Probability, Statistics and Data Science for Engineers
Department of Mechanical Engineering, Boston University

Graduate Teaching Fellow

September 2020- December 2020

EK 125 – Introduction to Programming for Engineers
Department of Mechanical Engineering, Boston University

AWARDS/HONORS

NSF Research Traineeship Program Understanding the Brain: Neurophotonics Trainee	2020
NIH Translational Research in Biomaterials Training Grant Trainee	2019
Boston University Biomedical Engineering Distinguished Fellowship	2019
University of Miami College of Engineering Senior Design Industry Impact Award	2019
Alpha Eta Mu Beta - National biomedical engineering honor society	2019
Omicron Delta Kappa Honor Society - National leadership honor society	2019
Tau Beta Pi Honor Society -National engineering honor society	2018
University of Miami President's Scholarship	2015
