## RESEARCH INTERESTS

I enjoy solving challenging biological and mathematical problems by crafting machine learning solutions backed by the implementation of massive data sets. My current research involves developing novel, and adapting existing, machine learning methods for analysis of large neuroscientific data sets to better understand the brain.

## EDUCATION

<b>PhD</b>	<b>Biomedical Engineering, Boston University</b> Dissertation: "Machine Learning Framework for Analyzing State-Dependent Neuronal Network Dynamics in Calcium Recordings" Advisors: John A. White, PhD & Mark A. Kramer, PhD	2019 - Present
<b>MS</b>	<b>Biomedical Engineering, Boston University</b>	2019 - 2022
<b>BS</b>	<b>Biomedical Engineering, University of Miami</b> GPA: 3.8/4.0, Cum Laude	2015 - 2019

## PROFESSIONAL AND RESEARCH EXPERIENCE

**Graduate Research Fellow** September 2020 – Present  
**Kramer Neurodata & Modeling Group, Department of Mathematics and Statistics, Boston University**  
Advisor: Mark A. Kramer, PhD

- Applied transfer learning to implement and fine-tune pre-trained Long Short-Term Memory (LSTM) Deep Neural Networks (DNNs) for automatic spike ripple detection in human epilepsy voltage recordings.

**Graduate Research Fellow** March 2020 – Present  
**Neuronal Dynamics Laboratory (NDL), Department of Biomedical Engineering, Boston University**  
Advisor: John A. White, PhD

- Developed and adapted linear and non-linear dimensionality reduction (DR) machine learning methods for unsupervised neuronal network analyses of calcium recordings under unique neural contexts.
- Built constraining for Non-Negative Matrix Factorization DR to allow for semi-supervised analytical approaches to similar neuronal network dynamics.
- Constructed software wrapper packages to make complex machine learning methods more easily accessible and implementable to end users.
- Collaborated with experimental lab scientists to iteratively adapt and apply machine learning analysis methods to their collected data to answer groundbreaking, novel, and complex neurological questions.
- Designed analysis pipeline for rigorously characterizing neuronal network dynamics under: increasing concentrations of anesthetic sedation, natural and artificial memory recall.

**Student Analyst** November 2023 – Present  
Office of Technology Development, Boston University, Supervisor: Frances Forrester, PhD

- Carried out comprehensive analyses of academic technologies assessing commercial viability and market potential, facilitating commercialization of promising ones.
- Conducted in-depth market landscape research, outlining where a technology might fit within the commercialization pipeline and the industry environment.
- Drafted invention assessments, detailing a foundational understanding of a technology, its field, and subsequent commercialization potential.
- Composed one-page promotional marketing briefs, describing the technology and its potential to prospective partners (licensing, sponsored research, etc.).

## **Venture Fellow**

March 2023 – Present

Breakout Ventures

- Handled early deal-flow, conducting the initial investment call, assessing the investment opportunity (scientific merit, market potential, operational readiness, intellectual property, etc.), and authoring concise company reports to provide strategic recommendations for subsequent steps to investment team.
- One of a limited number of fellows to have sourced deal-flow move into NDA diligence.
- Refined venture skills and proficiency with Breakout investment team, leveraging case studies to deepen understanding of successful biotech startup investing.
- Served as strategic partner in biotech hub of Boston, evaluating emerging technologies, startups, and entrepreneurs to source potential deals, and connect promising future opportunities with Breakout's resources.

## **Analytics Consulting**

January 2023 – Present

fit foodie living Inc

- Conceptualized, implemented, and maintain a data pipeline for scraping, cleaning, and processing data from an online platform to create and update an accessible customer database, supporting product launches and updates.

## **Associate Engineer**

May 2019 – August 2019

Bio-Vitro Inc, Supervisor: Siddarth Rawal, MD

- Optimized design of previously constructed fluid handling platform for unattended, automated, cell culture and cell signaling analysis under physiological conditions.
- Design was produced and sent to collaborating labs to make organs-on-chips more technically accessible.

## **Undergraduate Research Assistant**

May 2018-August 2018

Research Experience for Undergraduates – Neurological Prosthesis Research Laboratory, Department of Biomedical Engineering, Duke University, Advisor: Warren Grill, PhD

- Modified and completely automated a fully computational, Deep Brain Stimulation, Parkinson's Disease (PD) Neurological model to simulate networks of neurons using experimentally recorded data as inputs.
- Modeled PD brain using experimentally recorded, upstream, neuron firing as inputs to simulate and analyze downstream Thalamus activity, assessing effectiveness of Deep Brain Stimulation as treatment for PD.

## **Undergraduate Research Assistant**

May 2017 – May 2019

Physiometric Microsystems Laboratory (PML), Department of Biomedical Engineering, University of Miami  
Advisor: Ashutosh Agarwal, PhD

- Developed automated software pipelines for immunohistochemical fluorescent microscope image data acquisition, processing, and analysis for reproducible quantification of organ-on-chip systems.
- Wrote front-end software packages to allow end users to easily and reproducibly process and analyze image data for various platforms (heart, neuro-muscular junction, metastasis).
- Designed, prototyped, and manufactured an integrated and completely automated platform for continuous cell culture and dynamic cell secretion analysis of these organ-on-chip systems.

## **Student Analyst**

January 2017 – May 2017

Department of Continuing International Education, University of Miami, Supervisor: Magaly Abreu

- Created early iteration of real-time, self-updating student database to consolidate information and ease access.
- Wrote financial reports to visualize large volumes of financial information clearly and intuitively.

## AWARDS/HONORS

<b>F31 Ruth L. Kirschstein Predoctoral Individual National Research Service Award</b>	<b>2023</b>
NSF Research Traineeship Program Understanding the Brain: Neurophotonics Trainee	2020
<b>NIH Translational Research in Biomaterials Grant Funded Trainee</b>	<b>2019</b>
<b>Boston University Biomedical Engineering Distinguished Fellowship</b>	<b>2019</b>
<b>University of Miami College of Engineering Senior Design Industry Impact Award</b>	<b>2019</b>
Alpha Eta Mu Beta - National biomedical engineering honor society	2019
Omicron Delta Kappa Honor Society - National leadership honor society	2019
Tau Beta Pi Honor Society -National engineering honor society	2018
University of Miami President's Scholarship	2015

## SKILLS

**Machine Learning and Data Science:** Linear Dimensionality Reduction, Matrix Decomposition, Manifold Learning, Clustering, Unsupervised/Semi-Supervised/Supervised Learning, Deep Learning (Artificial Neural-Networks) Time Series Analysis, Image Analysis  
**Data Science Software:** Scikit-Learn, Scipy, Statsmodels, Pandas, Tensorflow, Numba  
**Programming:** Highly Proficient in: Python, MATLAB  
Comfortable with: HTML, CSS, R  
Familiar with: C++, Java  
**High Performance Computing:** Unix, Linux, Remote Super Computing Clusters, Code Parallelization (Python, MATLAB), GPU Computing, git Version Control  
**Engineering Design:** CAD, SOLIDWORKS, Rapid Prototyping  
**Software:** Arduino IDE, COMSOL Multiphysics, ImageJ  
**Document Preparation and Graphic Design:** Microsoft Office, Adobe Illustrator, Figma  
**Certifications:** Six Sigma Green Belt  
**Languages:** Native in Spanish, fluent in English

## LEADERSHIP & MENTORING

### Nucleate, Boston Chapter

#### Director of Communications

**June 2023 – May 2024**

- Directed all communications and managed the Communications team of the Boston chapter of Nucleate, a student-led organization aiming to facilitate venture creation of pioneering life science companies.
- Overhauled and implemented entirely novel pipeline to standardize communications from Boston chapter to target audiences.
- Served as liaison between Nucleate headquarters, local Nucleate program participants, and the Boston leadership team, solving logistical issues as they presented, or delegating them to the appropriate personnel.
- Wrote all promotional and professional materials advertising Nucleate programming to the Boston biotech community.
- Collaborated with other directors to set weekly communication and agenda and improve current communications workflow.

#### Vice President of Communications

**November 2022 – May 2023**

- Built automated email pipelines to ensure both chapter leadership, and program participants were up to date on all organizational information.
- Worked with the communications team, and directors of other teams, to write and publish weekly newsletter.

### Neuronal Dynamics Lab - 2021-2022 Senior Design Team Advisor

**August 2021 – May 2022**

- Advised and mentored senior design team through development of random forest and support vector machine (SVM) depth of anesthesia classifiers using standard neural recordings.

## INVITED TALKS

---

**Boston University Stochastic Processes in Neuroscience Seminar Series** Boston MA, December 2022  
**Principal Component Analysis as a Change of Basis for Neural Signals**

- Seminar series to discuss physical feasibility of stochastic models for neuroscientific data analysis.

**Boston University Neurophotronics Center Tech Talk Tutorial Series** Boston MA, September 2022  
**Linear Dimensionality Reduction for Analyzing Calcium Recordings (a toolbox)**

- Seminar series to spread awareness on technologies under development to foster collaboration between labs.

## TEACHING EXPERIENCE

---

**Graduate Teaching Fellow** September 2021- December 2021

EK 381 – Probability, Statistics and Data Science for Engineers

Department of Mechanical Engineering, Boston University

**Graduate Teaching Fellow** September 2020- December 2020

EK 125 – Introduction to Programming for Engineers

Department of Mechanical Engineering, Boston University
